

Technical Project Manager

DOES VARIATION, COMPLEXITY AND CHALLENGING TECHNICAL ELEMENTS MOTIVATE YOU?

Then it is you we need on our team of skilled Technical Project Managers at Thomas Group.

THE POSITION

As Technical Project Manager you will have a wide surface of contact both in and outside the company. Your tasks will besides technical project management include both design, analysis, quotations, purchase, plant visits and contact with the client. You will be working alone with smaller projects and on larger projects you will be a key contributor to project teams. In cooperation with our clients, engineers and technical management, you will have great influence on the actual technical solution.

YOU ARE

- ☪ You have a mechanical engineering background either as M.Sc. Mech. Eng. or M.Sc. Prod. Eng. in combination with project management such as Prince or similar
- ☪ You must have a wide experience with project management within engineering – preferred but not limited to the wind turbine industry
- ☪ You have experience handling clients and internal- and external stakeholders
- ☪ You master 3D CAD such as SolidWorks or Inventor
- ☪ You are fluent in the Danish and English language
- ☪ You have the ability to see solutions to complex challenges

As a person you are goal-oriented, professional and have drive. Your work approach is structured and you are motivated by variation and challenging work assignments.

WE ARE

At Thomas Group we are a strong team of engineers and consultants working close together to help leading companies in the wind turbine industry to lower the cost of energy.

We are located in Aarhus near to E45.

WE OFFER

Salary according to your qualifications, health insurance, lunch, fruit, massage, social events and a bunch of great colleagues who are eager to welcome you at Thomas Group.
